RE: LETTER OF RECOMMENDATION

Jay Knight:

We would like to THANK YOU for the fine service that Knight employees have provided. We don't remember how we first got to know Mark Noga, but with his help and the rest of the people including the office staff we have had a great time doing business with Knight Industries. Any time you would like to use the recommendation, have your customer call and talk to us or show off the work that has been done around the park please feel free to do so.

Working with Mark and Dick we have learned many valuable lessons on wastewater management. Mark is the kind of worker we would like to find to work for us in our business. Every contact that we have had with your employees has been a great experience.

Both of us have been vary impressed by the new technology that Knight Industries seems to come up with. We started with 2 1500 gallon aerobic units that were installed for Loretta's father to recover the failing sand filter. Over the past 2 years we have installed 3 White Knight units to recover over taxed leach fields.

Mark has kept us up to date on waste technology. Thank you for helping us bring and mairtain our waste water systems to one of the highest quality systems that we know of. Loretta loves to brag about the septic systems; she would put them up against any municipal system around. That is all due to the fine work of Knight Industries.

Sincerely,

Terry O'Connor
